SUMMARY

Full-stack Software Engineer with 1+ year of experience specializing in scalable ERP development using .NET and React.js. Proven ability to optimize system performance, lead cross-functional teams, and deliver robust enterprise solutions. Slated for promotion to Executive Software Engineer in Sept 2024 at Cultivie8 Technologies.

EXPERIENCE

Executive Software Development

Cultivie8 Technologies | Dhaka, Bangladesh

“Sept 2024 – Present”

- Spearhead end-to-end development of enterprise-level ERP modules, focusing on payroll, plucking, and employee management systems.
- Lead bug resolution and system optimization efforts, improving application stability and user satisfaction by 40%.
- Mentor junior developers in Agile practices, code reviews, and best practices for maintainable software design.
- Resolved critical QA-reported bugs across payroll, plucking, and employee report modules, including:
 - Fixed Pay Point filtration in Payroll Reports enhancing data accuracy.
 - Optimized data loading for Daily Plucking Details and Section Performance Reports.
 - Revamped frontend validation and session storage logic to ensure search persistence.
 - Integrated Excel/PDF export functionality for Biometric Summary and Check List modules.
- Overhauled database schemas and API endpoints to support dynamic filtration requirements, reducing report generation time by 30%.
- Partnered with QA teams to implement error-handling workflows for Holiday Calendar Listing, reducing user-reported errors by 50%.
- Cloned and customized application modules to meet updated business requirements, including database schema changes and backend API adjustments.

WordPress Developer Intern

“June 2023 – Nov 2023”

DataXpie | UK

- Developed and managed numerous WordPress projects, adhering to best practices in front-end and back-end development.
- Improved functionality and user experience (UX) by resolving plugin bugs and optimizing website performance.
- Utilized HTML, CSS, JavaScript, PHP, MySQL, and WordPress for developing custom themes and plugins.

SKILLS

- **Frontend:** React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Material-UI, Zustand/Redux
- **Backend:** .NET Core, C#, Node.js, RESTful APIs
- **Databases:** MS SQL Server, MongoDB
- **Tools:** Git, Firebase, Swagger, Redis, Docker, Jest
- **Practices:** Agile, Scrum, CI/CD, OOP, Performance Optimization, Unit Testing

PROJECTS

Capstone Project:

Multivendor E-commerce Website

[View in GitHub](#)

- Developed a full-stack multivendor e-commerce platform using the MERN Stack (MongoDB, Express.js, React, Node.js).
- Features: Real-time chat (Socket.io), secure payments (Stripe), seller dashboard, admin management, cart/wishlist, and review system.

Projects:

Instagram Clone

[View in GitHub/Live View](#)

- Developed a full-stack clone with React, Firebase, Zustand, Chakra UI, and Vite for optimized performance and scalability.
- Synchronized Google and Facebook user authentication, profile customization, post creation, and real-time interactions.

Travel Guide & Tourism Management System

[View in GitHub](#)

- Developed a mobile application using Java and Firebase to assist tourists with travel planning.
- Integrated map APIs, user reviews, and real-time data.
